

# FADHLILLAH

Backend Software Engineer | Java · Spring Boot · Microservices · 2M+ req/day | LLM · RAG · Python

South Jakarta, Indonesia | +62 851-5704-3131 | fadhlillah949699@gmail.com  
linkedin.com/in/fadhlillah2 | github.com/fadhlillah2 | fadhlillah2.github.io/Bio

## SUMMARY

Backend Software Engineer (6+ yrs) specializing in Java/Spring Boot, with experience across Python, Node.js, and Go. Built and operated microservices serving 2M+ requests/day in regulated banking, and builds LLM-integrated products end to end (RAG, chatbots, automation); Top 50 at the Meta Llama Hackathon. Open to full-time roles, international remote work, and consulting (WIB · UTC+7).

## EXPERIENCE

**FOX ASSET — INFINITY WAVE SDN BHD · MALAYSIA (REMOTE)**

Backend Software Engineer | Freelance · Dec 2025 – Present

- Primary backend engineer for the Safety Hub (Permit-to-Work/HIRARC forms + safety induction) on a multi-tenant CMMS SaaS — 23 Django data models, 50+ REST endpoints, ~21,000 lines of Python; async PDF pipelines (Celery, wkhtmltopdf, WeasyPrint) with QR-verified certificates
- Built the Project Management backend independently — 21 REST endpoints, 10 models, Kanban/timeline, S-Curve analytics, field-level RBAC — with 196 unit tests, plus 105 for the Safety Hub apps
- Hardened AWS/CI/CD in a 2-week engagement: removed exposed credentials, added gitleaks and a migration-drift gate, and built staging with an Amazon ECR deployment pipeline

**BANK DANAMON · JAKARTA, ID**

Software Engineer · Aug 2023 – Aug 2026

- Built and operated 12 Spring Boot microservices (hexagonal architecture) serving 2M+ requests/day at sub-200ms across 500k+ daily transactions
- Built and maintained iRecon, a Java/GWT reconciliation platform (660+ classes); automated its daily reporting cycle with batch jobs producing 10 formats incl. SWIFT MT940/942/950, delivered via Email/SFTP/MFT (PGP/AES)
- Shipped the FSC (Financial Supply Chain) modules over encrypted REST APIs to core-banking middleware (maker-checker approval, LDAP-based access, full audit trail); tuned queries and caching on the corporate reporting pipeline to consistently meet 48-hour reporting SLAs
- Delivered an SFTP automation platform in 10 days against a 17-day plan using AI-assisted development; LLM-assisted workflows cut documentation turnaround from 40 hours to 4 and lifted core-module test coverage (JUnit 5, Mockito) to 95%
- Shared service ownership within a 5-person engineering team; informally mentored peers

**IDSTAR · SOUTH JAKARTA, ID**

Backend Software Engineer | Remote · Mar 2023 – Jul 2023

- Developed and optimized 40+ RESTful APIs for the OML Innovoice platform using Spring Boot
- Cut unauthorized access by 95% by adding multi-layer authentication; implemented SSO (OAuth 2.0/JWT) and session tracking
- Implemented input validation and SQL-injection protections for OWASP Top 10 risks; Dockerized services on Azure; held code quality at 90+ via SonarLint and peer reviews

**ASSIST.ID · PEKANBARU CITY, RIAU, ID**

Backend Software Engineer · Jul 2020 – Feb 2023

- Accelerated report generation 700% via query tuning and materialized views
- Sustained 99.5% uptime while resolving ~100 production issues/month through root-cause analysis
- Built 100+ RESTful APIs for the IBBR healthcare system; integrated 40+ third-party services (payments, logistics, SMS)
- Built a Kafka-based notification system (freelance, alongside Assist.id) delivering 50k+ emails and SMS messages daily across POS and Kitchen Display systems

## PROJECTS

- High-Precision Contract Advisor RAG — Top 50, Meta Llama Hackathon; EasyOCR for scanned Indonesian contracts at 88%+ accuracy with PASAL/AYAT/BAB structure preserved; hybrid LangChain/ChromaDB retrieval + Groq (Llama 3.3 70B) — [github.com/fadhlillah2/llama-docs-auditor](https://github.com/fadhlillah2/llama-docs-auditor)
- Distributed Go rate limiter — fixed-window, sliding-window, and token-bucket algorithms; Redis Lua for atomic enforcement — [github.com/fadhlillah2/rate-limiter-project-go](https://github.com/fadhlillah2/rate-limiter-project-go)
- expert-advisor-mt-5 (private) — 6 MQL5 trading robots, 24/7 Linux VPS, preregistered live A/B experiment

## SKILLS

**AI/LLM** : RAG (Retrieval-Augmented Generation) — LangChain, ChromaDB (vector database), embeddings (Hugging Face); LLM (Large Language Model) integration — OpenAI, Llama, Groq; AI chatbots; AI-augmented engineering (Cursor AI)

**Languages** : Java, Python, JavaScript/TypeScript, Go (Golang), MQL5

**Backend** : Spring Boot, Django REST Framework, Celery, Quarkus, FastAPI, Flask, Node.js, Express.js

**Testing** : Unit testing (JUnit 5, Mockito)

**Architecture** : Microservices, Distributed Systems, High Availability, REST, GraphQL, Event-driven, Hexagonal Architecture

**Databases** : PostgreSQL, MySQL, Microsoft SQL Server, MongoDB (NoSQL), Redis

**Integration** : Apache Kafka, RabbitMQ, gRPC, WebSocket

**DevOps/Cloud** : Docker, Kubernetes, Jenkins, CI/CD, GitHub Actions, Flyway, AWS (ECS, ECR, EC2, S3), Azure

**Security** : OAuth 2.0, JWT, SSO, AES-256, OWASP Top 10, gitleaks

## EDUCATION

**UNIVERSITAS GADJAH MADA (UGM) · YOGYAKARTA, ID**

Bachelor's degree in Mathematics and Computer Science · Mar 2016 – May 2020

## CERTIFICATIONS

Meta Llama Hackathon 2025 — Top 50 (Hacktiv8 Indonesia)

freeCodeCamp — Machine Learning with Python, Scientific Computing with Python, JavaScript Algorithms & Data Structures;

HackerRank — SQL

Target roles: Backend Software Engineer · Backend Developer · Java/Spring Boot Engineer · Golang Engineer · GenAI Engineer · LLM Engineer
