

FADHLILLAH

Jakarta, ID • [email](#) • [phone](#) • [LinkedIn](#) • [GitHub](#)

OBJECTIVE

Backend Software Engineer (5+ yrs), deep in Java/Spring Boot and adaptable across Python, Node, and Go. Builds Spring Boot microservices serving 2M+ req/day and ships fast via AI-augmented workflows, building LLM-integrated products end-to-end (RAG, chatbots, internal automation). Equally at home in regulated enterprise systems and fast-moving AI builds.

EXPERIENCE

BANK DANAMON

JAKARTA, ID

Software Engineer

Aug 2023 – Present

- Built SFTP automation platform in 10 days against a 17-day plan using AI-augmented engineering
- Automated technical documentation with LLMs, cutting cycle time from 40 hours to 4 hours
- Built and operate Spring Boot microservices serving 2M+ req/day at sub-200ms response times
- Designed and maintained internal web and mobile apps supporting core banking operations

IDSTAR

JAKARTA, ID

Backend Software Engineer | Remote

Mar 2023 – Jul 2023

- Developed and optimized 40+ RESTful APIs for OML Innovoice using Spring Boot and session management
- Implemented enterprise SSO (OAuth 2.0/JWT) and session tracking to enforce authenticated access

FREELANCE

JAKARTA, ID

Full Stack Developer | Remote

Apr 2022 – Feb 2023

- Built Kafka-based notification system for real-time event processing
- Integrated 3+ third-party systems via RESTful APIs
- Developed AI chatbot with OpenAI integration on MERN stack
- Deployed containerized services to AWS ECS with Redis caching

ASSIST.ID

RIAU, ID

Backend Software Engineer

Jul 2020 – Feb 2023

- Designed and built 100+ RESTful APIs for IBBR and warehouse health-facility management systems
- Resolved ~100 technical issues monthly through root-cause analysis, maintaining 99.5% uptime
- Accelerated report generation by 700% via database optimization and materialized views
- Integrated 40+ third-party APIs for payments, logistics, and notifications

SKILLS

Languages : Java, Python, JavaScript/TypeScript, Golang
Databases : PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Redis, Flyway
Frameworks : Spring Boot, Quarkus, Node.js, Express.js, Flask, Gin, Flutter, Angular
Architecture : Microservices, RESTful API, Event-Driven Architecture, SOA, Hexagonal Architecture
DevOps/Cloud : Docker, Kubernetes, Jenkins, CI/CD, Maven, Git, AWS (EC2, S3, Lambda), Apache Tomcat
Messaging : Apache Kafka, RabbitMQ, gRPC, WebSocket
Security : OAuth 2.0, JWT, SSO, AES-256, TripleDES, OWASP Top 10
Tools : IntelliJ IDEA, VS Code, Cursor AI, Postman, DBeaver, Jira

EDUCATION

GADJAH MADA UNIVERSITY

YOGYAKARTA, ID

Bachelor, Mathematics and Computer Science

Mar 2016 – May 2020

PROJECTS & CERTIFICATIONS

- High-Precision-Contract-Advisor-RAG (Top 50 LLaMA Hackathon), SFTP Automation App (Java), Simulation Systems
- freeCodeCamp, HackerRank, Digital Talent Scholarship, Progate Certified
